

Health & Safety Policy of LINDE + WIEMANN SE & Co. KG and LINDE + WIEMANN Deutschland SE

LINDE + WIEMANN supplies the international automotive industry with structural components and assemblies. As a global supplier, we are aware of our responsibility towards our employees in our working environment and pursue the following goals:

We work continuously to improve our internal occupational health and safety management system. Process descriptions, work instructions and certification in accordance with ISO 45001 serve as the basis for this. Employees are involved in the further development of our management systems and processes. To this end, LINDE + WIEMANN conducts regular trainings and e-learning sessions.

Provide and maintain a safe workplace for all employees and stakeholders with the aim of preventing illness and injury: The necessary financial, structural and human resources are provided. Legal and regulatory requirements are complied with.

Continuous implementation of measures that reduce workplace injuries, hazards and health risks, protect lives and promote employee health. Risks and hazards are identified, assessed and eliminated.

Our sites have responsible employees who meet regularly in interdisciplinary teams. They identify potential for improvement and are responsible for ensuring that the measures decided upon are implemented.

Supervisors and supervisees have a special role model function. They actively exemplify occupational safety and health protection and ensure that employees behave in accordance with the guidelines.

Technical specifications contain safety-relevant requirements for a safe and ergonomic workplace. Together with our business partners, we ensure that our employees are protected from health hazards.
